Product Description

1064nm 532nm 2M RF Picosecond Laser Machine With 12inch Touch Screen

Product Description:

The Picosecond Laser operates on both AC220V±10% 50Hz and 110V±10% 60Hz voltage, making it a versatile machine that can be used in different countries. This machine also has a maximum energy output of 2000M, which makes it highly effective for a wide range of treatments.

With a wave length of 1064nm and 532nm, the Picosecond Laser is suitable for a variety of treatments, including skin rejuvenation, tattoo removal, and pigmentation removal. Its advanced technology enables it to deliver high-energy laser pulses in ultra-short picosecond durations, making it more effective than traditional laser machines.

The Picosecond Laser is also known as the 810 skin rejuvenation machine and is highly recommended by beauty professionals for its precision and effectiveness. This machine is easy to use and can be customized to suit the needs of different clients, making it a valuable addition to any aesthetic clinic or beauty spa.

If you are looking for an advanced laser machine that delivers precise and effective results, the Picosecond Laser is an excellent choice. With its advanced features and versatile capabilities, it is an ideal investment for any beauty professional or clinic looking to offer the latest and most effective aesthetic treatments.

Technical Parameters:

Technical Parameter	Value
Wave Length	1064nm, 532nm
Laser Power	2700W
Spot Size	2-10 Mm
Aiming Beam	Diode 655 Nm (Red), Adjustable Off/on
Other Name	Picosecond Laser
Energy Density	≤ 0.6 J/cm ²
Light Source	ND:YAG Solid Laser
Maximum Energy	2000M
Rf Frequency	2M
Screen	12inch

This product is also known as Fractional laser machine, Aesthetic Laser Machine, and Superpicosecond freckle machine.

C02 Fractional laser

3 system: Cutting, Fractional, Vaginal treatment

Fractional co2 Laser for skin rejuvenation and scar removal

Normal co2 laser for surgery operation

Vaginal tightening for optional.

Maintenance vagina

SIX FEATURES

- 1. Noninvasive, no irritation to the skin.
- 2. Suitable for a wide range, obvious effect.
- 3. Safe and painless, fast and effective.
- 4. Multi-function set, a machine with more.
- 5. Lasting effect, no damage hair follicles.
- 6. Short operation time, high comfort.

Applications:

The CPM-3 is equipped with a 12 inch touch screen, making it easy to navigate and control. This machine is ideal for clinics, hospitals, and beauty salons that specialize in skin care treatments. Here are some of the scenarios where the CPM-3 can be used:

Fractional infrared laser skin tightening: The CPM-3 is perfect for patients who want to improve the appearance of sagging skin. The fractional infrared laser technology targets the deeper layers of the skin, stimulating collagen production and tightening the skin. This treatment is ideal for the face, neck, and chest.

Tattoo Removal: The CPM-3 is also a superpicosecond freckle machine that can be used for tattoo removal. It is capable of removing both black and colored tattoos, with minimal scarring and discomfort. The energy density of the laser can be adjusted to suit the size and color of the tattoo.

Skin Rejuvenation: The CPM-3 can also help patients achieve younger-looking skin by improving skin texture and tone. The laser targets fine lines, wrinkles, and age spots, stimulating collagen production and promoting cell renewal. This treatment is ideal for patients who want to look and feel younger.

Pigmentation Removal: The CPM-3's energy density and adjustable wavelength make it ideal for removing pigmentation, including freckles, sun spots, and melasma. The laser targets the pigment cells, breaking them down and allowing the body to naturally eliminate them. This treatment is safe and effective, with minimal downtime.

The CPM-3 is a versatile and effective aesthetic laser machine that can help patients achieve their desired results. With its advanced technology and user-friendly interface, it is a valuable addition to any skin care clinic or hospital.

Customization:

Need a voltage that fits your country's standards? The Fractional laser machine operates with AC220v±10% 50Hz, 110v±10% 60Hz. We also offer product customization services to make sure you get the most out of your purchase. Trust us to provide you with the best picosecond laser on the market.

Support and Services:

The Picosecond Laser Machine is a cutting-edge laser technology that is designed to provide high-quality and efficient laser treatments. Our product technical support and services are aimed at ensuring that our customers get the most out of their Picosecond Laser Machine. Some of our technical support and services include:

- Installation and setup: Our team of experts will help you with the installation and setup of your Picosecond Laser Machine to ensure that it is up and running smoothly.
- Training and education: We offer comprehensive training and education to our customers to ensure that they are equipped with the knowledge and skills to operate the Picosecond Laser Machine effectively and safely.
- Maintenance and repair: Our technical support and services also include regular maintenance and repair of the Picosecond Laser Machine to ensure that it is always in good working condition.
- Software updates: We provide regular software updates to our customers to ensure that their Picosecond Laser Machine is always up-to-date and running at optimal performance.

Our technical support and services are designed to provide our customers with peace of mind knowing that their Picosecond Laser Machine is in the hands of experienced professionals who are dedicated to ensuring that it performs at its best.

Packing and Shipping:

Product Packaging:

The Picosecond Laser Machine will be carefully packaged in a sturdy wooden crate to ensure that it arrives to you in perfect condition.

Shipping:

We offer free shipping worldwide with DHL or FedEx. Once your order is placed, it will take approximately 5-7 business days for your product to arrive. We will provide you with a tracking number so you can track your order every step of the way.

FAQ:

Q: What is the brand name of this laser machine?

A: The brand name of this laser machine is **Fractional Laser Machine**.

Q: What is the model number of this laser machine?

A: The model number of this laser machine is **CPM-3**.

Q: Where is this laser machine manufactured?

A: This laser machine is manufactured in **China Guangzhou**.

Q: What is the wavelength of this laser machine?

A: The wavelength of this laser machine is **1064nm/532nm**.

Q: What is the function of this laser machine?

A: This laser machine is mainly used for tattoo removal, pigmentation removal, skin rejuvenation, and other cosmetic treatments.
